

Pool Cleaning Checklist

By Fae Fisher

- Cleaning a Pool
 - Clean deck around the pool or spa of all leaves and debris to keep them from blowing into the pool.
 - Check water level.
 - Check water chemistry Use a test kit or take a sample to the local pool store.
 - Use a surface skimmer or leaf net to collect all floating debris.
 - Clean the tile around the pool edge, using only pool tile soap.
 - Be sure that all equipment is operating correctly and there are no visible leaks.
 - Clean the skimmer basket and the pump strainer basket if needed.
 - Check the pressure on the filter while the pump is running
 - Vacuum the pool using the correct vac-head for your pool surface.
 - Brush the entire pool using the nylon brush attached to the tele-pole.
 - Brush the walls first and then brush the floor starting at the shallow end and working toward the bottom drain.
 - Be sure to put all the pool cleaning equipment and chemicals away safely.
