	Coedine
Im	portant Tips
	Sterilize all tools (scissors, tweezers, etc) first. Use alcohol swabs or heat with a lighter or matches.
	All bandages should be sterile Individual bandages should be sealed in individual packages.
	Ensure guides have instructions on how to perform life-saving techniques on children and infants as well.
	If someone in your family has a severe allergy (such as to nuts or shellfish) it is strongly advised to have an epipen in the kit, in addition to carrying an epipen with you on a daily basis.
	Be aware of any drug allergies Have them listed in case further medical attention is necessary.
	Toss the emetics Medicines used to induce ;vomiting, like syrup of ipecac, are no longer recommended for use.
