

Make Up Checklist

By Fae Fisher

- Eye Shadow
 - Cream eye shadows.
 - Sweep the shadow onto your eyes with a few finger strokes.
 - Use an eye shadow brush to create a stronger look.
 - Layer on deeper shades in the evening to create a smoky affect.
- Eye Make-Up
 - Use a primer to provide a more flawless look.
 - Apply your concealer to the eye area.
 - Use a foundation brush to apply foundation to the entire face and eye area.
 - Choose eyeshadow.
 - The lighter color in the palette should be applied all over the eyelid.
 - Use an eyeshadow crease brush to sweep the darkest color in your creases.
 - Apply a liner to the top lid only.
 - Sweep on 1 to 2 coats of mascara to finish off the look.
- Lip Liner
 - Choose a rich lip liner formula.
 - Before applying lip liner, apply a foundation primer to the lips.
 - Apply a high-moisture lipstick or lip stain to the lips.
 - Line your lips.
 - Make a soft line to avoid the "outlined lip" look.
 - Mudge the liner into the lips to smooth out any hard lines.
- Bronzer
 - Check out liquid bronzers.
 - Consider using a bronzing/blush duo.
 - Apply blush on the cheeks after applying bronzing powder.
 - Apply a bronzer with a little glitter.
 - Apply bronzer to the places where the sun would naturally hit (forehead, nose, and chin).
- Mascara

- Pay attention to what type of brush you're using.
- Curved mascara brushes - lift and curl your lashes.
- Comb mascara brushes - separate lashes to achieve a thicker look.
- Flexible mascara brushes - separate lashes at the root better than other brushes.
