

Minecraft Bedrock Biomes

By Checklist.com

- ☐ **Ocean**
Open seawater with kelp and seagrass.
- ☐ **Deep Ocean**
The deeper ocean variant; monuments can generate here.
- ☐ **Warm Ocean**
Look for coral reefs and tropical fish.
- ☐ **Lukewarm Ocean**
Sandy seabed and light-blue water, without coral reefs.
- ☐ **Deep Lukewarm Ocean**
Deeper warm-toned water; ocean monuments are possible.
- ☐ **Cold Ocean**
Dark-blue water, kelp and a mostly gravel seabed.
- ☐ **Deep Cold Ocean**
A deeper cold ocean, with potential ocean monuments.
- ☐ **Frozen Ocean**
Icebergs rise through patches of surface ice.
- ☐ **Deep Frozen Ocean**
Icebergs above deep water, without a continuous ice surface.
- ☐ **Mushroom Fields**
Mycelium islands with giant mushrooms and mooshrooms.
- ☐ **Jagged Peaks**
Sharp, snowy summits with exposed stone.
- ☐ **Frozen Peaks**
Rounded summits with substantial packed ice.
- ☐ **Stony Peaks**
Bare mountain summits in warmer regions.
- ☐ **Meadow**
Flower-covered grassland on mountain terrain.
- ☐ **Cherry Grove**
Pink cherry trees and petals around mountain foothills.
- ☐ **Grove**
Snowy mountain woodland with spruce trees.
- ☐ **Snowy Slopes**
Treeless mountain slopes covered in snow and powder snow.
- ☐ **Windswept Hills**
Rocky hills, cliffs and scattered trees.
- ☐ **Windswept Gravelly Hills**
Windswept terrain with extensive gravel rather than grass.
- ☐ **Windswept Forest**
Grassy windswept hills with more oak and spruce trees.
- ☐ **Forest**
Oak woodland mixed with birch trees.
- ☐ **Flower Forest**
A woodland clearing with abundant, varied flowers.

- ☐ **Taiga**
Spruce woodland with ferns and sweet berry bushes.
- ☐ **Old Growth Pine Taiga**
Giant spruce trunks with foliage concentrated near their tops.
- ☐ **Old Growth Spruce Taiga**
Giant spruce trees with foliage extending farther down.
- ☐ **Snowy Taiga**
Spruce forest with snow-covered ground.
- ☐ **Birch Forest**
Woodland dominated by white-barked birch trees.
- ☐ **Old Growth Birch Forest**
Look for birch trees much taller than usual.
- ☐ **Dark Forest**
Dense dark-oak canopy and giant mushrooms.
- ☐ **Pale Garden**
Pale oaks and pale moss distinguish this muted woodland.
- ☐ **Dappled Forest**
Poplar trees with red, orange or yellow leaves.
- ☐ **Jungle**
Tall jungle trees, vines and dense undergrowth.
- ☐ **Sparse Jungle**
Smaller, more widely spaced jungle trees.
- ☐ **Bamboo Jungle**
Thick bamboo stands among jungle vegetation.
- ☐ **River**
A winding watercourse cutting through the land.
- ☐ **Frozen River**
A river with an ice-covered surface.
- ☐ **Swamp**
Shallow water, vine-covered trees and lily pads.
- ☐ **Mangrove Swamp**
Mangrove roots rise above extensive mud.
- ☐ **Beach**
A sandy transition between land and water.
- ☐ **Snowy Beach**
Snow-covered sand beside cold coastal waters.
- ☐ **Stony Shore**
Rocky coastline where elevated terrain meets the sea.
- ☐ **Plains**
Open grassland with few trees.
- ☐ **Sunflower Plains**
Open plains with naturally growing sunflowers.
- ☐ **Snowy Plains**
Open, snow-covered terrain with sparse trees.
- ☐ **Ice Spikes**
Tall packed-ice spires rising from snowy ground.

- ☐ **Desert**
Sand, sandstone and cacti dominate the landscape.
- ☐ **Savanna**
Dry grassland with acacia trees.
- ☐ **Savanna Plateau**
An elevated savanna with broad, raised terrain.
- ☐ **Windswept Savanna**
Dramatic cliffs and overhangs among acacia trees.
- ☐ **Badlands**
Layered terracotta and red sand.
- ☐ **Wooded Badlands**
Oak trees grow above the terracotta landscape.
- ☐ **Eroded Badlands**
Narrow terracotta spires rise from the badlands.
- ☐ **Deep Dark**
Deep underground sculk; ancient cities can occur here.
- ☐ **Dripstone Caves**
Pointed dripstone hangs overhead and rises from the floor.
- ☐ **Lush Caves**
Moss, glow berries and dripleaf fill these caves.
- ☐ **Sulfur Caves**
Yellow sulfur and red cinnabar surround shallow pools.
- ☐ **Nether Wastes**
Mostly bare netherrack, lava and glowstone.
- ☐ **Soul Sand Valley**
Soul sand, soul soil, fossils and blue fire.
- ☐ **Crimson Forest**
Red fungal woodland with huge crimson fungi.
- ☐ **Warped Forest**
Cyan fungal woodland populated by endermen.
- ☐ **Basalt Deltas**
Jagged basalt and blackstone with scattered lava pockets.
- ☐ **The End**
Bedrock uses this one biome across the entire dimension.
