

Recycling Checklist

By Fae Fisher

- Glass Bottles and Jars
 - Remove all lids from containers.
 - Ensure they are clean of food scraps and have no liquid.
 - Keep jars and bottles empty of other materials.
 - There is no need to peel labels off containers.
- Steel and Aerosol Cans
 - Steel lids can be collected by placing them inside a steel can and squashing the open end together.
 - Use a magnet to check if the can is recyclable - if it sticks, it's steel and can be recyclable.
- Cardboard and Newspapers
 - Remove any plastic wrap from items.
 - Do not put waxed cardboard.
 - Keep cereal cartons and boxes empty of other materials.
 - Flatten boxes and cartons - this allows for more space in your recycling bin.
- Plastic Bottles, Tubs and Containers
 - All rigid plastic bottles, tubs and containers can be recycled.
